

How to Find Your Friends' Square Share in Three Haggess Wood - Meadow

Some people are keen to visit their Square Share; maybe you too would like to make regular trips to monitor the development of yours.

To locate your square on your mobile phone...

- Go to google maps (or download the app first if necessary) here:
<https://itunes.apple.com/gb/app/google-maps-real-time-navigation/id585027354?mt=8>
- In the top left hand box write in the coordinates N and W (no need for comma or similar in between). We have not found a way of adding degree symbols on a 'phone (you might be clever) but if you copy and paste from the co-ordinates in the list that seems to work.
- The coordinates will automatically lead you to the centre of your square on the map. If you look around you ten metres in every direction, that is your square (roughly the size of half a tennis court).
- To save this on your 'phone for later use, touch on the forwarding box on the top right (on apple I phone 5 it is top right) and then add to favourites.
- When you open your Google maps in future and search favourites, it should lead you straight there.

Please Note

We have tested these instructions with an Apple i phone; if you have a different brand of 'phone and want to pass on tips for other users your feedback would be very helpful. Please send it to Louise@haggewoodstrust.org.uk.

Thank you.
